My name is Mary Glenn and I am a concerned citizen regrading Microsoft and the Proposed Final Judgement. i stand in opposition to allow Microsoft to continue as a monopoly. In this country we must protect the freedom and rights of business to grow and not be monopolized by one company or organization. We promote the rights of the big and small in this country. and monopolies virtually eliminate competition and the ability for us as citizens to choose.

I encourage and urge you to reconsider this Proposed Final Judgement and rather judge in a way that promotes freedom for all organizations not just the one with the most power and money.

thank you for your consideration.
